As a follow up to one of the bilaterals made at the Disaster Risk Reduction Conference in Cancun, Mexico in May 2017, The Gambia joined the 26 countries using the Desinventar. Desinventar, is a software that creates a harmonised disaster risk information system all over the globe in accordance with standards from the Sandai Framework.

The objectives of this training are:

-
- Track disaster loses
- Report against sandai targets
- Have a probabilistic risk profile
